

SUNROCK

Press kit

April 2024

Facts and figures - Sunrock

Management Internat.	CEO: Johannes Duijzer CFO: Otto Jager COO: Elisabeth Stevens Executive Director Development: Hugo Willink Executive Director Energy & Assets: Wessel Wisman
Established	2012 in the Netherlands
Head office	Amsterdam, the Netherlands
Locations	Germany: Düsseldorf (head office), Hamburg France: Paris (head office) Europe-wide: 5
Surface area	over five million square metres of roof area equipped with photovoltaic systems

About Sunrock

Sunrock is the leading European developer of large-scale solar roofs and integrated clean energy solutions, developing customised energy strategies for owners and occupiers of logistics real estate and C&I (Commercial & Industrial) clients. The solar energy solutions include solar systems, battery energy storage systems (BESS), and asset management. The company takes care of all aspects of solar projects, including feasibility studies, subsidy applications, financing, insurance, and the operation and management of solar parks to optimise the use of the climate-friendly energy generated.

Sunrock was founded in the Netherlands in 2012 as a start-up in the field of solar energy for logistics properties. In 2020 COFRA Holding acquired

Sunrock as part of its commitment to positively impact, through business, key transitions that are crucial for a more liveable planet and equitable society. Sunrock is active in Germany, France, and the Netherlands and employs over 160 people in 2024. Projects totalling over 1 GWp are currently being realised.

Sunrock received B Corp certification for its measures in the areas of social and environmental sustainability. With this award, the company commits to regularly measuring and continuously improving its social and environmental impact.

The company wants to pave the way to a clean energy future with its customers.

Hugo Willink, Executive Director Development Sunrock

Hugo Willink is Executive Director Development at Sunrock. Before joining Sunrock in 2019 he gained international experience and management insights at leading companies like Worley and Randstad. Hugo specialises in team development, driving business growth and expanding Sunrock's European presence, all with an emphasis on creating a clean energy future. He holds a Master's degree in Spatial and Environmental Economics and resides in Düsseldorf, Germany, with his wife and two young children.

References/Projects

Rotterdam (Maasvlakte): In 2023, Sunrock completed the installation of a 25 MWp photovoltaic system on the roof of PATRIZIA's logistics centre at Rotterdam's Maasvlakte. Spanning 120,000 m², this solar installation is capable of meeting the annual energy needs of approximately 8,000 households. This project alone accounts for nearly half of the total solar power output of PATRIZIA's Dutch logistics real estate portfolio for 2023.

Dorsten (North Rhine-Westphalia): Sunrock has installed a photovoltaic system with an output of 3.45 MWp on the roof of Delta Development's "Positive Footprint Warehouse" logistics property, along with a 1,000 kWh Battery Energy Storage System (BESS) to enhance the use of the energy. The user, Levi Strauss & Co., is able to use green electricity in the property and reduce its carbon footprint by over 1,300 tonnes per year.

Rastatt (Baden-Württemberg): At Mercedes-Benz's Rastatt location, Sunrock installed a 5.2 MWp photovoltaic system, comprising 12,000 solar modules. This installation, set to go live in the third quarter of 2024, showcases the capability of large-scale solar roof systems for industrial use. The sustainable electricity generated by the PV system will be used onsite through a local power purchase agreement (PPA), supporting Mercedes-Benz's commitment to operating all production facilities with 100 percent renewable energy by 2039.
